

OpenBlue  
Enterprise Manager

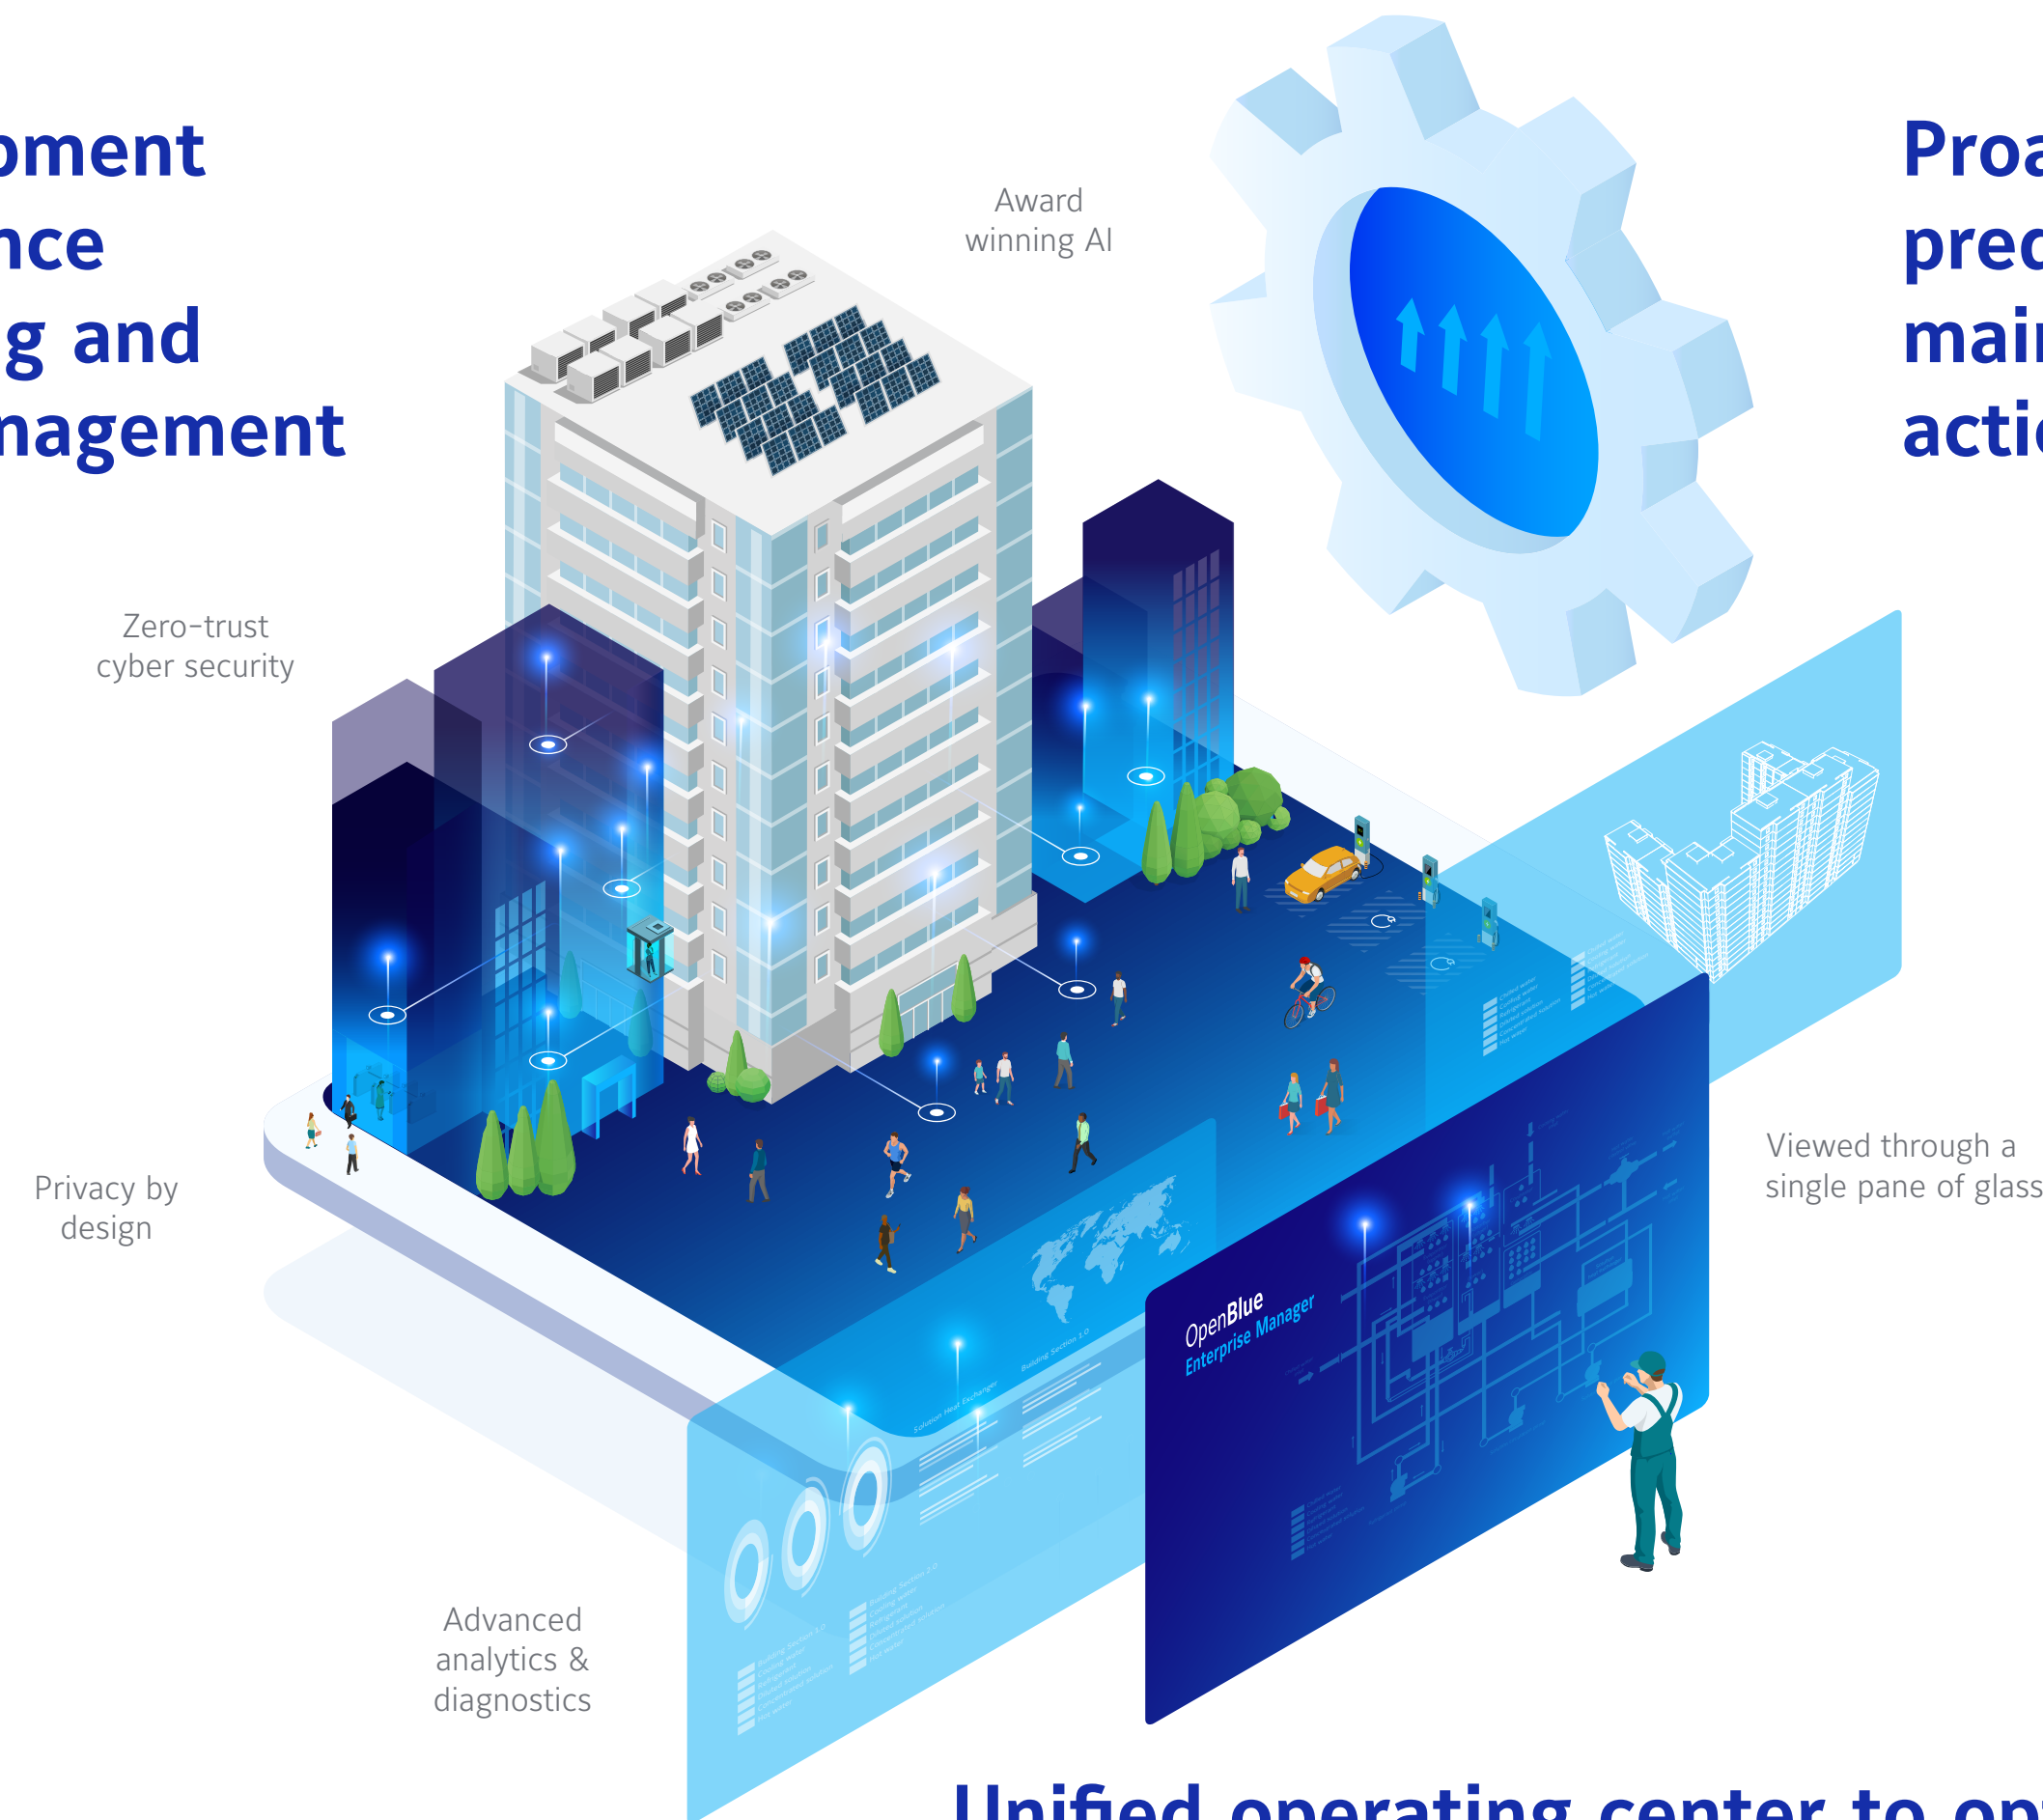

Operational  
Efficiency &  
Equipment  
Performance

Efficient building system optimization and smart facility management.

Advance operational efficiency through proactive management of equipment performance and optimization of maintenance services.

24/7 equipment performance monitoring and alarm management

Proactive and predictive maintenance with actionable insights

Unified operating center to optimize maintenance resource pool and incident response time

Create efficient building system optimization & smart facility management with the right digital solutions:
