

# Integrated alarms for safer, smarter communities

24/7/365 protection for secure, connected, and resilient communities

Valuable assets in local government buildings make tempting targets for intruders, including costly technology and confidential data about public contracts, citizens, and voters. Intruders often assume these municipal sites are less secure than those at retailers, banks, and healthcare locations.

Reduce the temptation with a best-in-class commercial system. Johnson Controls handles it all: customized needs assessment, turnkey installation, post-installation service, and 24/7/365 monitoring. Our fully redundant business security monitoring is provided through our UL Listed Customer Care Centers.

## Best-in-class alarm systems designed for municipal buildings of all sizes:

- Infrared, photoelectric, and motion sensors
- Industry-leading intrusion detection panels
- Easy, flexible integration with existing systems, including video, access control, and others
- Wireless and remote/online options
- Monitored 24/7 with emergency dispatch
- Alarm verification to reduce or eliminate false alarms
- Inspections, maintenance, service, and support
- Local, state, and federal regulatory compliance

## Johnson Controls has extensive experience delivering integrated alarm systems:

- Large public transportation hubs with multiple buildings and facilities
- Single-location buildings, such as courthouses, and open campuses, such as social services and public housing
- Urban, suburban, and rural locations
- Expertise in securing funding

# Integrated alarms expertise

You're assured of worry-free installation, service, and support – start to finish
