

Intrusion detection for your community

The ultimate protection for secure, connected, and resilient communities

With full responsibility for so many lives and the threat of attacks in public buildings and spaces, a world-class intrusion detection system is a vital part of every local government's security infrastructure.

Creating a welcoming and inclusive community includes being proactive in fostering a safe community and being able to respond to incidents. The impact otherwise can include injury or loss of life, litigation, soaring insurance rates, and the impact on every member of the community.

For the ultimate peace of mind, rely on the team that has protected thousands of communities across the United States. We install systems that keep careful watch 24/7/365. You'll find leading-edge perimeter protection and intrusion detection sensors, systems, and services, all matched to the specific needs of your community. We handle it all: initial layout, installation, testing, inspection, monitoring, and continued support.

Johnson Controls intrusion detection solutions safeguard some of the most secure facilities in the nation – your citizens, administrators, businesses and administrators deserve that same level of elite protection.

Build a targeted solution that fits each individual facility:

- Integrate your intrusion detection with video surveillance
- Remote management including remote arm/disarm and alert notification
- Protect all officials and administrators in public buildings with hold-up and panic buttons
- Control security from anywhere with Mobile Security Management
- Car barriers, K-rated gates, card access, and more deny unauthorized access
- A full spectrum of monitoring and reporting tools to oversee facility access

Johnson Controls has extensive experience delivering intrusion detection:

- Large municipalities with multiple types of buildings
- High volume and significance sites such as courthouses, police stations, prisons and transportation hubs
- Urban, suburban, and rural locations
- Expertise in securing funding

Intrusion detection experts
