

Add a Metasys server (ADS/X)

Work smarter and faster with the Metasys UI

Empower your facilities team and position your building for long-term success. Metasys server software includes the powerful Metasys user interface, designed for the way facilities managers really work. Make operation more intuitive to achieve sustainability, comfort and energy savings objectives. The latest Metasys release enables direct controller/device connections to the server without hardware engines—a cost-effective option for future integrations and additions.

Add Metasys user interface benefits

With Metasys server software, you can expand data collection and storage to support better system performance; ensure compatibility and scalability to extend Metasys longevity; and configure the Metasys user interface. This world-class UI brings your team a host of benefits:

- Get to vital data faster — up to 86% fewer clicks — with intuitive navigation based on spaces and equipment.
- Better visualize spaces with photo-realistic graphics. Includes online graphics generation and editing.
- Quickly identify and prioritize alarms, for faster troubleshooting.
- Help even inexperienced staff prevent and fix issues, minimize energy waste and avoid comfort complaints, using Fault Detection & Fault Triage.

- Help prevent unauthorized access with security enhancements that align to the latest industry standards and regulations. Use the award-winning Cyber Health Dashboard to understand and address potential cyber security issues.
- Work from anywhere, on any device, with a fully mobile-optimized experience.

Move away from the out-of-support Site Management Portal (SMP), reducing the risk of disruptions. Step up to the Metasys UI to ensure long-term BAS stability, supportability and security.

Consider scalable Metasys UI implementation

The industry-leading Metasys UI lets you navigate your system via spaces and equipment, for an intuitive, simplified user experience. Or choose “network view” for a familiar legacy look and feel.

Program details

Metasys software with MUI deployment incentives

- 40% off Metasys upgrade or migration software
- 40% off Metasys 1- or 3-year software subscriptions
- 40% off new Fault Detection software
- 40% off new Fault Triage software

Fault Detection & Fault Triage add-on bundle incentives

(for sites with an existing server at latest revision with MUI configured)

- 40% off new Fault Detection software
- 40% off new Fault Triage software

Promotion valid through September 2025.

All materials must be ordered by September 15, 2025. Contact your Johnson Controls representative for more information.

Terms & conditions

1. At time of purchase, order must contain:
 - Upgrade or migration software subscription (1-year or 3-year)
2. Microsoft sequel (SQL) software versions excluded.
3. Turnkey machines excluded.
4. Valid for existing Metasys customers only.
5. Current Metasys revision and existing SW serial numbers required.
