# FACILITY EXPLORER

Introducing a New Limited-Time Promotion to Upgrade Your Facility Explorer System

Start your Facility Explorer system modernization today.

Avoid the inefficiencies of older building automation system components by making sure your Facility Explorer Supervisory Software and Controllers are up to date. Upgrading eases integration with new technologies and components, and helps reduce the risk of security breaches. In fact, updating and upgrading software is No. 1 on the U.S. National Security Agency's top 10 cybersecurity mitigation strategies.[1]

This limited-time upgrade program includes a significant discount on Facility Explorer Supervisory Software Release 14.x when you upgrade your Facility Explorer Supervisory Controller. Additionally, by taking advantage of the Facility Explorer Upgrade Program, you are eligible for a 5-year Software Maintenance License (SML) for the price of a 1-year SML.

Johnson Controls

The power behind your mission

Maximize system performance with the Facility Explorer Upgrade Program

The FX80 Supervisory Controller is an advanced replacement for legacy Facility Explorer Supervisory Controllers and provides access to the latest Facility Explorer Supervisory Software 14.x with the modernized interface and graphics.

Key features delivered with this upgrade include:

- New modernized 3D graphics library for creating standard and customized graphics that provide a consistent, modern look for all system graphics
- Mobile-optimized HTML5 responsive design leveraging the same user interface to display graphics on any type of device
- New home screen with customizable tiles to represent important information and shortcut links
- 45 pre-built system graphic templates that cover the most common HVAC applications, which saves you time and money
- Our new standard system graphics can be automatically generated by the Import Manager with the ability to select between different graphic packages

Program description

Facility Explorer customers with legacy FX20s, FX30s, FX40s, FX60s, or FX70s running on FX Supervisory Software Release 6.x (Niagara AX) that upgrade to FX Supervisory Software Release 14.x on a FX80 Supervisory Controller are eligible for the following discount:

- **Through December 13, 2024, 25% off core FX80 licenses, plus a 5-year SML for the price of a 1-year SML**

Eligibility, terms & conditions

Legacy Supervisory Controller Models

- FX20s, FX30s, FX40s, FX60s, or FX70s that are running FX Supervisory Software Release 6.x (Niagara AX)
- Legacy supervisory controllers, with any Brand-ID, including non-Facility Explorer brands

Drivers, software options and accessories

- All standard drivers supported by FX Supervisory Software Release 14.x will be migrated
- Non-standard third-party drivers will need to be licensed through the supplier

Requirements

- Purchase of 5-year SML required
- Host IDs of any legacy FX Supervisory Controller that is deactivated in the FX Supervisory Software Release 14.x upgrade process will need to be provided
- The deactivated legacy FX Supervisory Controllers must be rendered inoperable or destroyed within 180 days of upgrade date
- Reference "FX Upgrade (or Loyalty) Program" on the purchase order

Modernization helps you get the most out of your Facility Explorer investment. We can help you develop a cost-effective upgrade plan.
