Johnson Controls

Product Security Advisory

Date   August 19, 2021   JCI-PSA-2021-12
                                                                 ICSA-21-243-01

Overview
Johnson Controls Kantech KT-1 version 2.09.02 is an Ethernet-ready single door controller, supporting two readers. KT-1 version 2.09.02 runs on the Windows CE operating system. In April 2021, KT-1 version 3.02.01 was released which runs on an updated Linux operating system.

Impact
Windows CE is no longer supported by Microsoft and no longer receives security updates. KT-1 version 2.09.02 has been replaced by KT-1 version 3.02.01 which runs on an updated Linux operating system. To mitigate the risks associated with the deprecated Windows CE operating system, we are advising our customers to upgrade to KT-1 version 3.02.01.

Affected Versions
All versions of KT-1 version 2.09.02 and earlier.

Mitigation
Upgrade KT-1 firmware to version 3.02.01.
