

Product Security Advisory

October 28, 2021

JCI-PSA-2021-19
CVE-2019-19492
ICSA-21-301-01

Overview

Johnson Controls has confirmed a vulnerability impacting the American Dynamics victor Video Management System. A SIP calling feature in the victor product which enables communication between the victor client and cameras used a hard-coded password. Customers should upgrade to victor version 5.7.1.

Impact

A SIP component of victor used a hard-coded password.

Affected Versions

- victor version 5.7 and prior

Mitigation

- Disable SIP feature in versions prior to 5.7.1
- Upgrade victor to version 5.7.1
