

## Product Security Advisory

January 10, 2025

JCI-PSA-2024-11 v2  
CVE-2024-32861  
ICSA-24-191-05

### Overview

Johnson Controls has confirmed a vulnerability impacting Software House C•CURE IQ Web and C•CURE Portal version 3.00.3 and prior.

### Impact

Under certain circumstances the impacted Software House C•CURE 9000 installer will utilize unnecessarily wide permissions.

### Affected Versions

- Software House C•CURE 9000 version 3.00.3 and prior when the optional C•CURE IQ Web and/or C•CURE Portal is installed.

### Mitigation

- Remove **Full control** and **Write** permissions. For non-administrator accounts, limit permissions to **Read & Execute** on the following path:
  - C:\CouchDB\bin
