

K-12 Education Intrusion Detection

As vital as your education outcomes

With full responsibility for so many young lives and the threat of rising school-targeted attacks, a world-class intrusion detection system is as vital to your educational institution as the quality of your education.

Preventing just one incident more than covers the cost of a top-quality system multiple times over. Just consider the impact otherwise: injury or loss of life; litigation; soaring insurance rates; and eroded reputation among students, parents and the community.

For greatest peace of mind, rely on the team that has protected thousands of K-12 schools. We install top-quality systems that keep careful watch 24/7/365. You'll find leading-edge perimeter protection and intrusion detection sensors, systems and services, all matched to your school's specific needs. We handle it all: initial layout, installation, testing, inspection, monitoring and continued support.

Johnson Controls intrusion detection solutions safeguard some of the highest-security facilities in the nation – your students, parents, teachers and administrators deserve that same level of elite protection.

Build a targeted solution that fits each individual facility:

- Integrate your intrusion detection with video surveillance
- Remote management including remote arm/disarm, and alert notification
- Protect teachers and administrators with hold-up and panic buttons
- Control security from anywhere with Mobile Security Management
- Car barriers, k-rated gates, card access and more deny unauthorized access
- A full spectrum of monitoring and reporting tools to oversee facility access

Johnson Controls has extensive K-12 security experience:

- Large public districts with multiple schools
- Parochial, charter and other private schools
- Urban, suburban and rural locations
- Expertise in securing funding

K-12 Education Security Experts
