

# BPS funding resources

States and cities nationwide are enacting building performance standards (BPS) that require building owners to reduce their carbon footprint—a significant financial investment. Check the resources below for funding options, and let Johnson Controls help you comply affordably.

**C-PACE.** All the basics on commercial property-assessed clean energy programs, with links to help you determine eligibility.

**C-PACE Fact Sheet.** A summary of C-PACE benefits and operation for both potential borrowers and state/local governments.

**PACE Nation.** National nonprofit that advocates for PACE financing. Includes map of programs in the U.S.

**DSIRE.** Database of State Incentives for Renewables & Efficiency. Explore policies and incentives in your area.

**ITC.** Investment tax credits available for projects such as hydropower and marine energy. Let us help you explore.

**Section 179D deduction.** Eligibility and tax deduction amounts for energy efficient commercial buildings.

**EnergyStar.** Tax deductions for new equipment that improves energy efficiency for your property.

**Johnson Controls Capital Funding.** Experts ready to help you structure BPS financing for maximum benefit. Contact us today.

**1. Start with a facility assessment.**  
Have Johnson Controls experts clarify current and anticipated energy needs, review indoor air quality, and check system size.

**2. Build your business case.**  
Our team develops models specific to your equipment and facility, giving you a clear picture of potential efficiency gains and lifecycle cost improvements.

**3. Follow a step-by-step plan.**  
We lay out a BPS compliance plan based on your goals and budget, with a menu of options tailored to your facility. Contact us now to get started.
